DAN CLELAND TO LEAD WESTWOOD'S SCOTTSDALE OFFICE

May 17, 2011

SCOTTSDALE, AZ – [Westwood Professional Services, Inc.](http://www.westwoodps.com), a national land and energy development consultant, established a Scottsdale, Arizona office earlier this year to better serve their renewable energy and land sector clients in the southwest. The firm announced this week that Daniel Cleland, RLA, ASLA, has been assigned to lead the local operations.

Cleland joins Westwood from Cleland Group, a Phoenix-based design firm which he owned and operated for over 10 years. Dan brings 25 years of experience managing multi-disciplined offices and has successfully led teams on the development of large-scale projects across the country.

In addition to supporting southwest utility-scale energy needs and running operations in Scottsdale, he looks forward to merging his design philosophy and experience with Westwood's expertise in land and energy development. Cleland says, "Blending my 30 years of southwest design experience with Westwood's land design and commercial renewable energy expertise will enhance our collective design capabilities. I am excited to provide the southwest with such a unique blend of capabilities."

Westwood president, Paul Greenhagen says, "Dan's designs are widely recognized in the region. We are excited to have him with us to better serve our renewable energy clients in the area and to further support his clients as the land sector regains momentum."

Westwood provides services to both commercial- and utility-scale energy clients across the country. The firm is currently working on several renewable energy projects throughout the Southwest including design and engineering for K Road Power's 650MW+ Calico solar project and surveying and engineering services for Iberdrola Renewables' Dry Lake 1 and 2 wind project.

About Westwood:

[Westwood Professional Services, Inc.](#) (Westwood) is a multi-disciplinary consulting firm providing complete and sustainable solutions to Land and Energy development clients nationwide. The firm provides solutions to support the development of projects from concept to completion. Those services include land surveying, aerial mapping, LiDAR, GIS, civil engineering, renewable system design, siting and land rights, planning, environmental, cultural resources, landscape architecture, transportation engineering, visualization, construction management, and NPDES & SWPPP compliance. Westwood was established in 1972 and serves clients across the country from multiple U.S. offices.
