WESTWOOD EXPANDS TO SUPPORT COMPANY-WIDE GROWTH

October 14, 2011

DALLAS, TX – [Westwood Professional Services, Inc.](http://www.westwoodps.com), (Westwood) a national land and energy development consultant, has relocated to larger offices in the Dallas/Fort Worth area of Texas. The company plans to be operating out of their new offices by Monday, October 17.

The move was necessary to support the firm's anticipated addition of professional and technical staff in the area resulting from company-wide growth. Bryan Powell, PE, oversees Westwood's Texas operations in the Dallas/Fort Worth and Midland areas. "Our expansion will support the increased workload we anticipate over the coming months. With the uptick we are seeing in all areas of our business, our relocation will allow us to better serve our clients and attract the best professionals to help us do that."

Westwood's energy group has been involved in the siting, permitting, design, and construction of more than 250 wind, solar, electric transmission, and oil, gas, and pipeline projects across the country. The firm's core services for energy development include surveying, aerial mapping, LiDAR, civil engineering design, and environmental solutions.

The land group at Westwood specializes in large master planned communities, retail centers, industrial parks, office facilities, institutional, apartments, senior housing, and multi- and single-family developments.

About Westwood Professional Services, Inc. (Westwood)

Founded in 1972, Westwood staff has successfully provided quality surveying, engineering, environmental, and planning solutions on more than 250 national energy projects, 500 commercial development projects, and 50,000 residential units. Westwood is a multi-disciplinary consulting firm, serving clients from multiple U.S. office locations, and provides complete and sustainable solutions to Land and Energy development. Westwood's services include land surveying, aerial mapping and LiDAR, GIS, civil engineering, siting and land rights, jurisdictional and regulatory permitting, planning, renewable energy design, environmental, cultural resources, landscape architecture, transportation engineering, visualization, construction management, and NPDES & SWPPP compliance.
