SAFETY FIRST - WESTWOOD BECOMES ISNETWORLD REGISTERED

January 12, 2009

MINNEAPOLIS, MN – [Westwood Professional Services Inc.](#), a national land and energy development consultant, has become a registered contractor and supplier for ISNetworld, a Global Contractor and Supplier Management Corporation. Receiving the registration demonstrates Westwood's thorough understanding and knowledge of safety standards and training, compliance monitoring process, and strict record keeping practices.

Dwight Jelle, President, says that the registration exemplifies Westwood's commitment to excellent client service, "Westwood is better equipped to serve clients having the most stringent safety requirements. We can immediately place field crews on projects now that they are prequalified to ISNetworld safety standards."

Jelle also sees opportunities for the company and its employees, "As a company, we view this as a great opportunity to expand our market share as well as further develop our professionals in the field."

Scott Buscher, Director of Human Resources adds, "Westwood holds health, safety, and environment practices to the highest level and continually searches for new ways to provide the highest safety standards and awareness for our employees' protection. We understand that safety pays and that our customers can depend on us to meet their safety standards."

Registrations with the Pipeline Testing Consortium, NCMS (National Compliance Management Service), and US DOT Federal Motor Safety programs are also part of Westwood's culture. Looking forward, we have started with the registration process with PEC Premier (Petroleum Education Council), a safety management company that standardizes the petroleum industry compliance safety practices.
