WESTWOOD OPENS A SECOND TEXAS OFFICE

October 22, 2009

MINNEAPOLIS, MN – National land and energy development consultants, [Westwood Professional Services, Inc.](http://www.westwoodps.com), is excited to announce the opening of a Midland, Texas branch office. Westwood's new Midland office marks their second Texas location, joining Westwood's Texas central office in Dallas.

Initially, the Midland office will provide aerial mapping, surveying, civil engineering, and environmental services to their energy clients, but Westwood's Energy Sector Vice President, Paul Greenhagen, anticipates further diversification in the future, "We are a full-service firm and support a wide variety of clients through all phases of their projects. With a strong client base in Texas, we expect to further diversify our services as well as the markets we serve."

The Midland office is located in the Texas Permian Basin; an area rich in oil and natural gas, and thriving on energy production. According to Greenhagen, "Our Midland and Dallas locations are positioned to best serve our energy clients, while maintaining existing relationships with our land clients. Our new office in Midland is central to supporting our oil and gas clients, as well as our wind, solar, and electric transmission clients that are currently very focused in the area."

Registered land surveyor and Midland veteran, Greg Shoults, recently joined Westwood to manage and lead surveying services in the new office. Greenhagen says, "Greg joins us with 28 years of proven success providing land surveying for the oil/gas industry, electric utilities, and route corridors. Greg understands the business, the clients, and the area. We are excited to have him on the team and look forward to working with him to develop Westwood's presence in Midland."

"Providing a local, permanent presence for our Texas clients is a priority for Westwood," says Greenhagen. "Thanks to Westwood's existing strong relationships with local clients, the Midland office is off to a quick start. Pair that with strong projections for the South and Greg's existing relationships, we anticipate much success in Midland."
